

**Arlington High School Alternative Placement**  
 (for graduates who plan to take mathematics at EvCC within one year of high school graduation or for Running Start students.)

*As of: 11/30/2021*

The goal of Everett Community College is to encourage student success in mathematics. Realistic placement is critical for a student's success. In addition to our ACCUPLACER assessment, students may be placed according to the following chart:

AP Statistics	See EvCC Catalog	Follow placement for highest math course taken above.	

NOTE: Students who took Segmented Math, AMPED, Construction Geometry, Cognitive Algebra, or Cognitive Geometry must use be placed by ACCUPLACER or by highest math course taken prior to that course.

\* Math& 141, 142, 144, 148, and 151 require significant time and effort, often more than the minimum of 10 hours of out of class study time per week. Math& 144 is a condensed review of the topics in Precalculus (Math& 141 and Math& 142).

Placement by this method expires one academic year after the student graduates from high school. The sooner the student takes his or her math class at EvCC, the better success the student is likely to have, since math skills tend to be forgotten over time.

**Please communicate to the students that if, after the quarter starts, they feel that they have been placed in a math class that is too advanced, they should talk with their instructor.**
