Health Web Sites

General Health

Centers for Disease Control and Prevention

<http://www.cdc.gov/>

Information on disease and health topics.

Familydoctor.org

<http://familydoctor.org/>

Prevention and disease/disorder information for the entire family—kids to seniors—from the American Academy of Family Physicians. Special features include a directory of family physicians and a guide to over-the-counter medications.

Food & Nutrition Information Center

<http://www.nal.usda.gov/fnic/>

Nutrition and food safety information from the National Agricultural Library.

Healthfinder.gov

<http://www.healthfinder.gov/>

Guide to diseases, conditions, and injuries. There's also a drug database and links to dozens of online health check-up screenings.

Kids Health

<http://www.kidshealth.org/>

This Nemours Foundation site has separate sections geared especially to parents, kids, and teens. It covers general wellness and development issues as well as specific illnesses.

Mayo Clinic

<http://www.mayoclinic.com/>

Health information from the well-known Mayo Clinic. The ask-a-specialist feature brings in specialists from many areas to answer readers' questions.

MEDLINEplus

<http://medlineplus.gov/>

The National Library of Medicine brings together extensive online information about diseases and conditions as well as both prescription and non-prescription drugs. Links to medical dictionaries and directories are also available.

Merck Manual

<http://www.merck.com/pubs/>

The publishers of *The Merck Manual* make it and other publications freely available online.

NOAH: New York Online Access to Health

<http://www.noah-health.org/>

Health information put together by a group of New York libraries. Most of the site, including outside links, is available in both English and Spanish.

PDR.net

<http://www.gettingwell.com/>

Disease and drug information for the public from the publishers of the *Physicians' Desk Reference*.

Specific Diseases & Disorders

HIV InSite

<http://hivinsite.ucsf.edu/>

Created by the Center for HIV Information at the University of California San Francisco, this site provides up-to-date information on HIV/AIDS treatment, prevention, and policy around the world.

National Cancer Institute

<http://www.cancer.gov/>

Information, including treatments and clinical trials, on different types of cancer. Some information is directed to the general public and some to health professionals. Site includes a drug guide and cancer dictionary.

Journal Articles

JAMA: The Journal of the American Medical Association

<http://jama.ama-assn.org/>

Abstracts of recent articles and selected full-text articles are available for free.

MedBioWorld

<http://www.medbioworld.com/med/journals/nurse.html>

Links to dozens of nursing journals from various publishers.

New England Journal of Medicine

<http://content.nejm.org/>

Full-text is available for articles 6 months and older to registered users (free).

PubMed

<http://www.ncbi.nlm.nih.gov/entrez/query.fcgi>

Access to the National Library of Medicine's MEDLINE database with millions of article citations, beginning with the mid-1960s.

Scientific American

<http://www.sciam.com/>

Select articles available for free in full-text.
