

College in the High School

Do I meet the course placement or prerequisite?

High School teachers will be responsible to verify that placement/prerequisite has been met using the Alternative Math Placement Model or the SBA score report. Teachers may perform the verification or ask their Registrar or counselor for assistance.

When the high school teacher verifies their roster in late November, they will enter in the comments section on the grade roster:

Placement Met – the student has met the course placement based on the Alternative Math Placement Model or Smarter Balanced Assessment Score Report

Instructor Permission – the student has not met the placement based on the Alternative Math Placement Model or Smarter Balanced Assessment Score Report; however, high school teacher is overriding placement with Instructor Permission.

Placement Not Met – EvCC will direct student to take the Accuplacer Placement test
