GENERAL INFORMATION
Everett Community College offers a number of pathways toward technical careers, using stackable certificates and degrees. The first level, for students seeking entry into the technical world would be the **Manufacturing Pre-Employment Certificate**, a credential that would allow one to work in entry-level manufacturing. The next level up would be to take classes leading to a **Skills-Oriented Certificate**. And for those seeking a higher level of education, and the job skills and responsibilities that go with it, EvCC offers skills oriented **ATA Degrees**. This Advanced Manufacturing Technology curriculum guide describes all three levels in the Precision Machining discipline. This program also provides a flexible framework for the incorporation of credit from prior learning in industry or government. An early conference with one of the designated advisors is strongly suggested for success.

**THE PROGRAM**
The Advanced Manufacturing Technology – Precision Machining Program is part of a cluster of programs. Four **Associate in Technical Arts degrees** and nine **certificates** in Advanced Manufacturing Technology are offered, and may be pursued on a full-time or part-time basis at Everett Community College (EvCC).

**ATA degree Programs:**
- Advanced Manufacturing Tech – Precision Machining
- Advanced Manufacturing Tech – Technical Design (CAD)*
- Advanced Manufacturing Tech – Composites*
- Advanced Manufacturing Tech - Welding and Fabrication*
- Advanced Manufacturing Tech -- Mechatronics

* Described in a separate guide.

**Certificate Programs:**
- Manufacturing Pre-Employment
- Precision Machining
- Engineering Technology (CAD)*
- CATIA 3D Experience *
- Composites *
- Welding and Fabrication *
- Mechatronics
- Introduction to Composites *
- Introduction to Robotics
* Described in a separate guide.

The overall program is designed for maximum flexibility, in that one may choose to take one or two courses to enhance their current skills, or pursue a certificate or degree, depending on their goals. The program outcomes for students pursuing the degree will prepare them to perform the following tasks:
- Solve technical mathematical problems
- Read and understand basic engineering drawings
- Understand and utilize machine technology
- Write programs and setup CNC machines
- Operate and perform maintenance on CNC machines
- Document technical activities in written and verbal reports
- Be prepared for successful employment

**CREDIT FOR PRIOR LEARNING**
Adults with work experience or completion of industry training programs may be eligible for college credit by following “External Credit” evaluation procedures. Students currently in high school may take selected technical courses while in high school and apply at that time for college credit.

External Credit: Contact Enrollment Services
Call: 425-388-9219
Tech Prep: www.everettcc.edu/techprep
Or contact your high school counselor

**THE COURSES**
The courses for this program may be divided into four categories: related instruction requirements (15 credits), common technical requirements (32 credits), technical core concentration classes (31 to 40 credits), technical electives (credit varies) and the final capstone class (5 credits). Students seeking an ATA degree will take the number of credits shown in each area plus a number of technical elective classes until the total credit accumulations meets or exceeds the degree requirement. Note that a minimum of 28-40 credits need to come from any one technical concentration to qualify for that particular degree. The actual courses are listed further on in this curriculum guide. See the diagram below for an understanding of how the courses interrelate.

**GETTING STARTED AT EVCC**
Our Enrollment Services Office provides information about application, advising, orientation and registration for new and continuing students. Students interested in the program should talk to an advisor prior to selecting classes for the first quarter:
- Advising 425-388-9339
- Enrollment Services 425-388-9219
- Precision Machining (Darin Chase) 425-388-9390
- CAD (David Primacio) 425-267-0160
- CAD (Sean Auger) 425-388-9534
- Mechatronics (Ken Ackerman) 425-388-9290
- Welding (Robert White) 425-388-9457
- Welding (Karl Fulton) 425-388-9447
- Composites (Michael Patching) 425-388-9092

Approved by Instructional Council March 2020
The courses required for an Associate in Technical Arts Degree in Advanced Manufacturing Tech – Precision Machining are listed below. Students should meet with an advisor and maintain this checklist while at Everett Community College. The quarter before expected completion, this checklist should be submitted with a diploma application to the Enrollment Services Office. EvCC does not offer every course each quarter, so please consult a class schedule and an advisor to plan course selections. Note that to earn this degree, a cumulative GPA of 2.0 or higher must be maintained.

* If you already have the certificate, this class was embedded in the certificate and you don't need to take it. Additionally, the following courses may be substituted for MFG T 101: MFG T 107, 119, 113 or 202.

**Interested in transferring to a university?**

Students completing this ATA degree can transfer directly to the Information Technology and Administrative Management (ITAM) program at Central Washington University or to the Manufacturing Operations program at Clover Park Technical College to pursue a Bachelor of Applied Science (BAS) degree. Go to [www.cwu.edu/it-management/bas-overview](http://www.cwu.edu/it-management/bas-overview) or [www.cptc.edu/programs/basmo](http://www.cptc.edu/programs/basmo) for more information.

Principles of Precision Machining: Certificate

GENERAL INFORMATION
The Principles of Precision Machining Certificate program is designed to provide students with the basic skills necessary to gain employment as machine operators. Students will develop skills in applied machining including basic math, basic and advanced blueprint reading, conventional lathe and mill operations, small shop tools and operation, shop safety and teamwork. This certificate may be considered a stand-alone credential for people seeking to enter the Precision Machining field, or as part of a stackable set of certificates and degrees in the EvCC Advanced Manufacturing Program leading to a degree in Precision Machining.

There is a current need in Washington for more than 1,000 CNC operators. Graduates of this certificate program may work in companies of different sizes, from small shops to large aerospace companies. Indicators show the industry will remain strong beyond the year 2020.

PROGRAM INFORMATION
The two- quarter program will focus on skills used in a modern machine shop. The first quarter focuses on machine shop math, blueprint reading, and conventional machine tool theory and lab. CNC is introduced. The second quarter builds upon skills gained in the first quarter, adds in geometric dimension and tolerance, applied math skills including geometry and trigonometry; and more CNC programming and operations.

PROGRAM OUTCOMES
- Solve technical mathematical problems
- Read and understand basic engineering drawings
- Understand and utilize machine technology
- Write programs and setup CNC machines
- Operate and perform maintenance on CNC machines
- Document technical activities in written and verbal reports
- Be prepared for successful employment

Manufacturing Pre-Employment Certificate

GENERAL INFORMATION
The Manufacturing Pre-Employment certificate is a one-quarter program designed to prepare students to work at the entry level in a manufacturing facility and the aerospace industry.

This course serves as an introduction to manufacturing. The knowledge and skills acquired in this course are required for entry level positions in diverse workplace scenarios with special emphasis on aerospace. Content includes a survey of mechanical concepts, precision measurement, blueprint reading, quality assurance, workforce skills/communication, ergonomics, lean manufacturing, and sustainable business practices.

This certificate may be considered a stand-alone credential for people seeking to enter the manufacturing field, or as part of a stackable set of certificates and degrees in the EvCC Advanced Manufacturing Program.

GETTING STARTED AT EVCC
Our Enrollment Services Office provides information about application, advising, orientation and registration for new and continuing students. If students have questions about applying or getting started they may contact Enrollment Services. Contact:
♦ Enrollment Services, Parks Student Union, 425-388-9219 admissions@everettcc.edu
♦ Advising Center, Rainier Room 108, 425-388-9339

PROGRAM CERTIFICATE OUTCOMES
• Understand and solve basic technical mathematical problems
• Communicate orally and in writing about technical activities
• Be prepared for successful employment
• Understand and work with entry level technical and mechanical systems
• Perform work using basic computer skills
• Meet industry requirements for safety and first aid

For specific guidance about this certificate, contact:
♦ Advanced Manufacturing Training & Education Center (AMTEC) 425-388-9570, mfg@everettcc.edu

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.everettcc.edu/gainfulemployment

Certificate: Manufacturing Pre-Employment
12 Credits

This checklist is targeted at students with an interest in an entry level manufacturing systems and/or the aerospace industry. Upon enrollment, this checklist should be submitted with a diploma application to the Enrollment Services Office.

DEGREE ELECTIVES

You may complete elective credits to satisfy the ATA degree requirements in this program. These should be technical in nature, but need not be if your selection enhances your ultimate employability. Any college level English course, for example, would enhance your communication skills and be considered acceptable. Please browse through the college catalog and examine the wide variety of courses offered at EvCC. The following list is presented for your convenience and represents some of the more commonly selected elective courses.

COMPOSITES TECHNOLOGY

CT 161 Materials and Processes
CT 202 Composites
CT 120 Composite Fabrication
CT 125 Composite Assembly
CT 130 Composite Repair
CT 145 Composite Special Projects

MANUFACTURING TECHNOLOGY

MFG T 102 Manufacturing Employment Readiness
MFG T 107 Machining with Mastercam
MFG T 113 CNC Cutting Solutions
MFG T 202 Lean and Operations Management

TECHNICAL DESIGN (CAD)

ENG T 100 Introduction to Engineering Graphics and 2D AutoCAD
ENG T 103 Introduction to Revit
ENG T 196 Advanced Workbenches with CATIA 3D Experience
ENG T 203 Intermediate AutoCAD
ENG T 259 Engineering Graphics (SolidWorks II)
ENG T 193 Intermediate Catia
ENG T 217 CAD Projects

WELDING

WELD 111 Basic Layout
WELD 150 Blueprint Reading for Industry
WELD 151 Carbon Steel Metallurgy for the Trades
WELD 152 Welding Base Materials: Processes & Procedures
WELD 153 Non-Ferrous Metallurgy for the Trades
WELD 190 Oxyacetylene
WELD 191 Basic Arc
WELD 192 Advanced Arc
WELD 193 Basic Pipe
WELD 194 Gas Tungsten Arc Welding (TIG)
WELD 195 Gas Metal Arc/Flux Core Arc Welding
WELD 196 Flux Core Arc Welding
WELD 210 Heavy Plate Fabrication
WELD 211 or Sheet Metal Fabrication or
WELD 217 Advanced Sheet Metal Fabrication
WELD 212 Pipefitting & Pipe Systems Fabrication
WELD 213 Practical Fabrication and Advanced Welding Techniques
WELD 214 Sub-Arc Welding
WELD 216 Advanced Tig Welding
WELD 225 Welding Skills Building
WELD 285 or CNC Plasma Cutting or
WELD 286 Aerospace CNC Plasma Cutting
WELD 295 Work Experience Internship
