Phlebotomy Technician Training

GENERAL INFORMATION
This program is designed for students with no prior knowledge of phlebotomy techniques and procedures. Anatomy and physiology of the blood and circulatory system, phlebotomy skills, quality assurance, and medical laboratory information are stressed. All procedures meet standards for phlebotomy training developed by the Clinical Laboratory Standards Institute.

Upon successful completion of classroom and clinical externship training, the student meets eligibility requirements to sit for the national certification exam sponsored by the American Society of Clinical Pathologists (ASCP).

ABOUT PHLEBOTOMY
Phlebotomy is the act of drawing or removing blood from the circulatory system through a cut (incision) or puncture in order to obtain a sample for analysis and diagnosis. Phlebotomy is also done as part of the patient’s treatment for certain blood disorders.

Phlebotomists are trained to work with infectious specimens. When proper methods of infection control and sterilization are followed, few hazards exist. Protective masks, gloves, and goggles are often necessary to ensure the safety of personnel.

Hours and other working conditions of clinical laboratory technologist and technicians, such as phlebotomists, vary with the size and type of employment setting. In large hospitals or in independent laboratories that operate continuously, personnel usually work the day, evening, or night shift and may work weekends and holidays. Laboratory personnel in small facilities may work on rotating shifts, rather than on a regular shift. In some facilities, laboratory personnel are on call several nights a week or on weekends, in case of emergency.

Laboratories and patient areas usually are well lighted and clean; however, specimens, solutions, and reagents used in the laboratory sometimes produce fumes. Phlebotomists may spend a great deal of time on their feet.

Hourly wages and salaries vary according to location and type of medical setting, and average around $29,730 per year.

Occupational Exposure: Students planning to enter the Phlebotomy Tech Program need to know that as a health care provider they are at risk for exposure to bloodborne pathogens. Tasks and procedures performed by health care professionals involve risks classified by the Center for Disease Control in the following way:

Category I – Direct contact with blood or other bodily fluids which universal precautions apply.

HEALTH 220 ENROLLMENT PROCEDURES
Complete the Phlebotomy Technician Application and return it to the Health Professions Service Center, Liberty Hall Room 251; 425-388-9461.

If you have previous college classes that need evaluation, turn in a placement test waiver with unofficial transcripts to Enrollment Services for a review of your transcript for placement and prerequisites. Once you are enrolled in a class at EvCC, request an official evaluation with official transcripts through Enrollment Services.

PREREQUISITES FOR PHLEBOTOMY TECHNICIAN
The following criteria must be met prior to admission to Phlebotomy Technician:

- Completion of high school or GED
- Placement into or completion of ENGL & 101
- Adequate manual dexterity and physical ability, including but not limited to adequate vision, hearing, and physical stamina.
- Create a Complio account at www.everettccpassport.com where you will upload your immunization records and other documents that are required for the program
- A national background check will need to be completed online at www.everettccpassport.com

Computer Competence: Students are strongly advised to possess computer skills that include word-processing, file-saving and transfer, internet and e-mail use. Lack of competence in these skills may result in inability to complete program requirements. Students who do not possess these skills may benefit from successfully completing CL 101, Computer Literacy.
